

21 October 2020

Let's Look Back and Learn

COVID-19 began impacting our lives in March 2020 and that now seems like a decade ago. In reality it has been just eight months.

In such a challenging time in our lives it is worth looking for 'gold nuggets' of kindness and innovation and it is time to celebrate new ways of doing things that have been embraced by our lay and medical communities.

At 6.30pm AEDST on Wednesday, 28 October 2020, *Consumer Connect* will host Professors Adam Jaffe, Peter Wark and Peter Middleton for a COVID-19 update and a discussion about what are the 'Lessons Learned in Lockdown'.

Register and share your thoughts about telehealth, video consultations, Hospital in the Home, wearable devices and AI.

Have you missed spending time with your MTD team or has technology allowed for effective engagement and communication? Importantly, have you put off procedures, has your health suffered as a consequence or are you now more able to manage your own care?

Professors Jaffe, Wark and Middleton have a great deal to share about the effect of COVID-19 on the CF Community here and around the world and we also want to hear from you.

To ask a question and participate in the event register here: <https://cfa.padlokt.com/consumer-connect/video/covid-19-update-infection-control-telehealth/register>
