CONQUER CF NOW

The name speaks for itself, Conquer CF is a cystic fibrosis (CF) charity run out of Western Australia who offer amazing support for our cause and play a key role in funding CF research.

This week applications will close for their latest Conquer CF Innovation Grant and this is an unmissable opportunity for CF researchers, especially those who are hatching new and innovative ideas.

Many promising research projects languish on the backburner without the necessary funds to jumpstart progress or gather up initial data. This is an unfortunate state of affairs in any scientific domain by in the field of CF research it could mean the difference of life or death for the individuals whose lives we are trying to save and improve.

This urgency is felt by patients, families and of course the researchers themselves, who are all too aware that medical research is always done against the clock. Conquer CF are prepared to provide up to \$50,000 over a full year to help one fortunate and deserving respiratory research project to make its mark.

The Grant is open to post-doctoral researchers, scientists, clinicians, medical practitioners, nurses and allied health currently working in the area of cystic fibrosis (CF) or proposing to work in CF research in the Respiratory field. Respiratory is defined here to include any part of the respiratory tract, as well as directly related issues such as sinus and asthma, and lungs. The researchers will have completed their studies in CF or a related area within the past five years.

Applications can be made [HERE](#) through the CFA website and must be received no later than **5.00 pm AEDST, Friday, 6th November 2020.**

Kind regards
