Cystic Fibrosis 2021 Innovation Grant

Cystic Fibrosis Australia (CFA) is pleased to announce the 2021 Innovation Grant for post-doctoral researchers, currently working in cystic fibrosis (CF) research. This grant is awarded annually to one applicant for one year.

The Innovation Grant will allow a CF researcher to explore novel concepts at the initial feasibility stage. Innovative applications relating to any aspect in the field of CF are encouraged, even those lacking pilot data. The grant aims to allow the researcher to generate sufficient data within the one-year grant period to be in a position to apply for additional support from an appropriate funding body to continue the research.

The Innovation grant will be offered to post-doctoral researchers currently working in or proposing to work in CF research. The researcher will have completed a research higher degree in CF or a related area within the last ten years.

The recipient of the Innovation Grant is required to provide progress reports on their research to CFA every six months. In addition, and where appropriate, the recipient will be asked to make a presentation at a CFA conference (held every two years) in Australia.

The maximum amount awarded under the Innovation Grant will be \$80,000. The actual amount provided will be subject to approval of the applicant's budget.

Applications can be made through the website of The Thoracic Society of Australia & New Zealand (TSANZ) and must be received by **TSANZ** no later than **5.00 pm (AEDT) 29th January 2021**.

Applicants must submit their application **via the TSANZ awards submission portal**.
