

11 June 2021

SNAPSHOT

The greatest tragedies in life are missed opportunities. At CFA we seek to foster new ideas and the brightest talent in the CF research space.

If you have untapped ideas or underfunded projects that you believe can be the next step forward in CF treatment or care, then we encourage you to step up and apply for the following funding opportunity.

The Conquer CF (GI) Innovation Grant

CFA is proud to partner once again with Conquer CF for the Conquer CF (GI) Innovation Grant. Conquer CF is a West Australian charity founded by parents of children living with CF. This grant is one of the more targeted and specific funding opportunities, one that may be a perfect fit for your research project or proposal.

With its current generous endowment of (up to) \$50,000, the Conquer CF Grant is looking to target gastro-intestinal research and foster new ideas in this important sub-field of CF medicine.

The grant is open to post-doctoral researchers, scientists, clinicians, medical practitioners, nurses and allied health currently working in the area of cystic fibrosis (CF) or proposing to work in CF research.

One additional opportunity that comes with the Conquer CF Grant is a spot on the speaker's roster at our bi-annual conference. This is a chance to get your ideas in front of the most influential and educated minds in CF research, as well as an incredible opportunity for CF networking.

Recipients of the Conquer CF (GI) Innovation Grant are required to provide progress reports on their research to CFA every six months. Applications can be made [HERE](#) through the CFA website and must be received no later than 5:00 pm AEST on Friday, 25th June 2021.

Kind regards
