

Donate today to help support people living with Cystic Fibrosis.

Firstly, we want to take this moment to thank each and every one of you who has supported us. Your generosity ensures outcomes can be achieved.

Over the past month we have shared with you stories from our wonderful community and the individual outcomes they have encountered. We have heard from Tom, Jess, Bradley, and Lizzie; people who live with, or have loved ones, living with cystic fibrosis (CF).

What we can see from these stories is just how resilient and strong our community is. Sharing stories enables the power of perspective. It can be a powerful tool in creating hope for others.

Each person in our stories spoke about being positive and optimistic; and never giving up.

In the 1960's the average life expectancy for a baby born with CF was 6 years old. Thankfully, supporters, researchers, and advocators never gave up and today life expectancy has extended to 47 years.

This is your moment, be a part of changing lives and supporting long-term outcomes.

At Cystic Fibrosis Australia (CFA) we want to ensure we continue this fight. We aim to extend life expectancy to 55 years by the year 2025 and to do this we need your support.

Your donation to CFA will help to:

- Increase advocacy for people living with CF
- Promote the importance of Clinical Improvement and Patient Experiences across all of Australia
- Support the on-going research into CF as well as the co-morbidities associated with CF.

Our hope is that one day a cure is found. Until then, we must continue supporting and advocating for the many people living with CF and the many babies yet to be born with CF.

There is still time to donate.

If you haven't had the chance to make a donation yet, please take a few minutes to do it now.

Help transform lives for people living with CF with a tax-deductible gift **today**.

Donate \$2 or more before June 30th to receive a tax-deductible receipt.
