

16 February 2023

SALT IN MY SOUL

You are invited to the screening of **SALT IN MY SOUL** as part of Lixa's Antimicrobial Resistance (AMR) Awareness Australia event!

Dates for the event are:

Perth - 3rd March
Brisbane - 7th March
Adelaide - 10th March
Melbourne - 14th March
Sydney - 16th March

The goal of the event, as a whole, is to grow community awareness and understanding of AMR. We want to put a human face to the growing threat of resistance and we want to bring together policy makers, researchers, clinicians and patients to talk about AMR in a way that everyone can understand. We want to give the community the chance to ask questions of AMR experts - people who have seen the effects first-hand and can answer audience questions in layman's terms. The panel will be a mixture of planned questions from the moderator and audience questions via Slido.

Diane Shader Smith is a champion of antimicrobial resistance and CF. The movie is about Mallory, her daughter's journey through CF and the parents' journey through finding phage and finding out at her autopsy that phage was beginning to make an impact. It's a heart wrenching movie but Diane is now using this platform to champion antimicrobial resistance awareness and of course CF.
