Help us develop a questionnaire to track the daily impact of tummy symptoms for people with cystic fibrosis

It is important that we have a CF-specific tool so that researchers can understand the daily impact of tummy symptoms for people with CF when it comes to studies, trials, treatments + ongoing care.

This will help us address the CF tummy issues that matter most to YOU.

Help us by taking part in our study by downloading the app and completing it daily for 2 weeks.

CFTummytracker.org

Who can take part?

- Anyone with **cystic fibrosis** aged 12 or over
- People **with and without** tummy symptoms
